NPIC/R-618/64**PREFACE**

This report is one in a series on Soviet Ground Force and Logistic installations being prepared for a DIA/CIA Panel. The series is being coordinated, published and disseminated by NPIC. The photographic analysis is being performed by the NPIC Photographic Analysis Group, the CIA Photographic Intelligence Division (NPIC), and the Production Center 1P1c (DIA). The photographic analysis for this particular report was performed by the Production Center 1P1c.

In the interest of uniformity, the titles and letter designators for the facilities observed at these installations are identical with those appearing in the project requirement. When a specific facility is not observed both its title and letter designator are omitted in the report.

Titles and letter designators for the various facilities are as follows: (A) railroad service, (B) road service, (C) landing strips, (D) administrative and troop housing areas, (E) storage areas, (F) ammunition storage areas, (G) POL storage areas, (H) other buildings and facilities, (J) equipment storage/maintenance areas, (K) athletic fields, (L) small arms firing ranges, (M) driver training areas, (N) tank/assault gun firing ranges, (P) flat trajectory firing ranges, (Q) artillery emplacements (batteries), (R) infantry or combined arms field training areas or courses, (S) special training facilities, (T) unidentified facilities or tracking activity.

NPIC/R-618/64**SUMMARY**

A probable military installation is located on the east side of Ternopol, USSR (Figure 1). The installation covers approximately 80 acres, is road served and has rail access.

The installation (Figures 2 and 3) contains the following major buildings: five multistory barracks, three multistory administrative buildings, three administrative buildings, one vehicle maintenance building, two vehicle storage buildings, 10 storage buildings, two probable multi-

story dependents quarters, and one water tower. Training facilities include an athletic field and nearby stadium.

The installation is active and little change has been noted since [REDACTED]. However, increasing improvement in the quality of photography shows buildings which are not new but which could not be identified on earlier photography.
